DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I in the reply filed on May 19, 2009, is acknowledged. The traversal is on the ground(s) that there would not be an undue burden for the Examiner to search all the claims at the same time. This is not found persuasive because, as set forth in the restriction requirement, Groups I, II, III do not relate to each other. Therefore, the requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 discloses that "the impact is sustained from a middle of delamination of the laminated body to prevent an impact absorbing ability of the impact-absorbing composite structure from being deteriorated." It is highly unclear to the Examiner what is meant by this limitation. Clarification and/or amendment to the claim is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1794

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Kitano et al. (US 2002/0179390). Kitano et al. disclose an impact energy absorbing member that sufficiently absorbs impact energy from a moving body when collision occurs (abstract). The member comprises fiber reinforced resin that is composed of reinforcing fibers such as carbon, glass, or aramid fibers [0048 and 0062] that are partly impregnated with thermosetting or thermoplastic resins [0069]. The material undergoes a stitching step to fix the fibers [0086].
